THE CHALLENGE

For hundreds of thousands of Chinese families, paying overseas tuition represents one of the most complex financial transactions they will undertake. Traditional banking channels are slow, expensive, and opaque. Universities, meanwhile, struggle with fragmented payment collection across currencies and payment methods.

A leading cross-border payment company identified an opportunity to create a purpose-built solution connecting Chinese families with educational institutions worldwide.

THE APPROACH

We designed and built an **International Tuition Payment Portal**—a consumer-facing platform enabling Chinese families to pay tuition fees in RMB while universities receive funds in their local currency.

Consumer Experience

The platform supports multiple payment channels familiar to Chinese consumers: UnionPay card payments, Alipay, WeChat Pay, and bank transfers. Real-time currency conversion with transparent exchange rates eliminates hidden fees and uncertainty.

Global University Network

Through integration with partner networks including Western Union Business Solutions and UnionPay International, the platform connects families to 400+ universities and higher education institutions across nine countries spanning North America, Europe, and Asia-Pacific.

Compliance by Design

Cross-border payments into and out of China require meticulous attention to regulatory requirements. The platform incorporates automated compliance checks aligned with Chinese foreign exchange regulations and international AML standards.

THE IMPACT

400+

Universities connected across 9 countries

4+ Payment Methods

UnionPay, Alipay, WeChat Pay, Bank Transfer

Real-Time FX

Transparent exchange rates with no hidden fees

Fully Compliant

Automated regulatory checks for cross-border transfers

The portal transformed a complex, opaque process into a seamless experience—enabling Chinese families to pay overseas tuition with confidence.

PARTNER ECOSYSTEM

The platform operates in partnership with major global payment networks, providing end-to-end payment services from Chinese consumers to global educational institutions.
